# How to install the Motif Sonar instrument definition file:
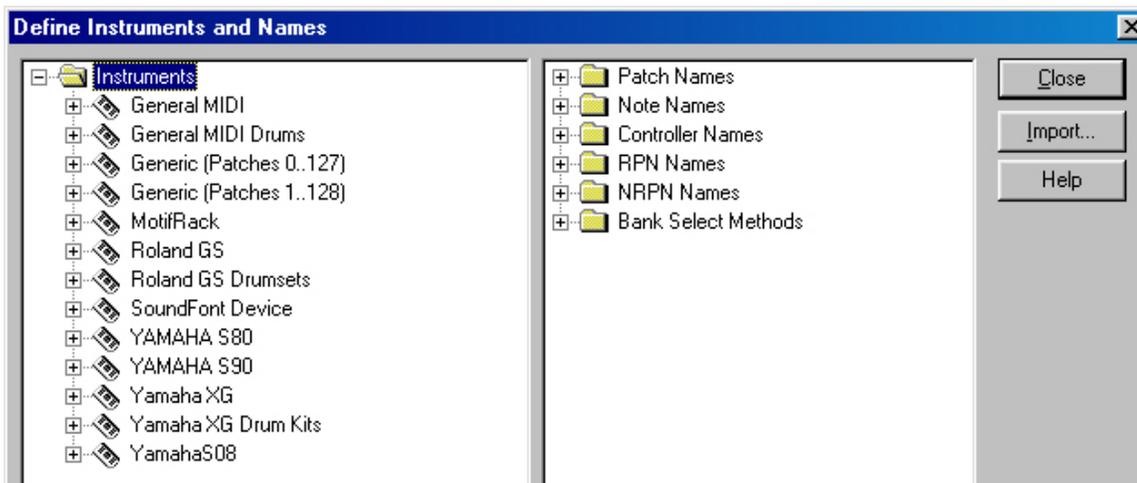

Download Cakewalk.ins file to a place where you can easily locate it (i.e. your desktop).
After opening Cakewalk/Sonar, go to the **Options** menu.   And "click" on [INSTRUMENTS].

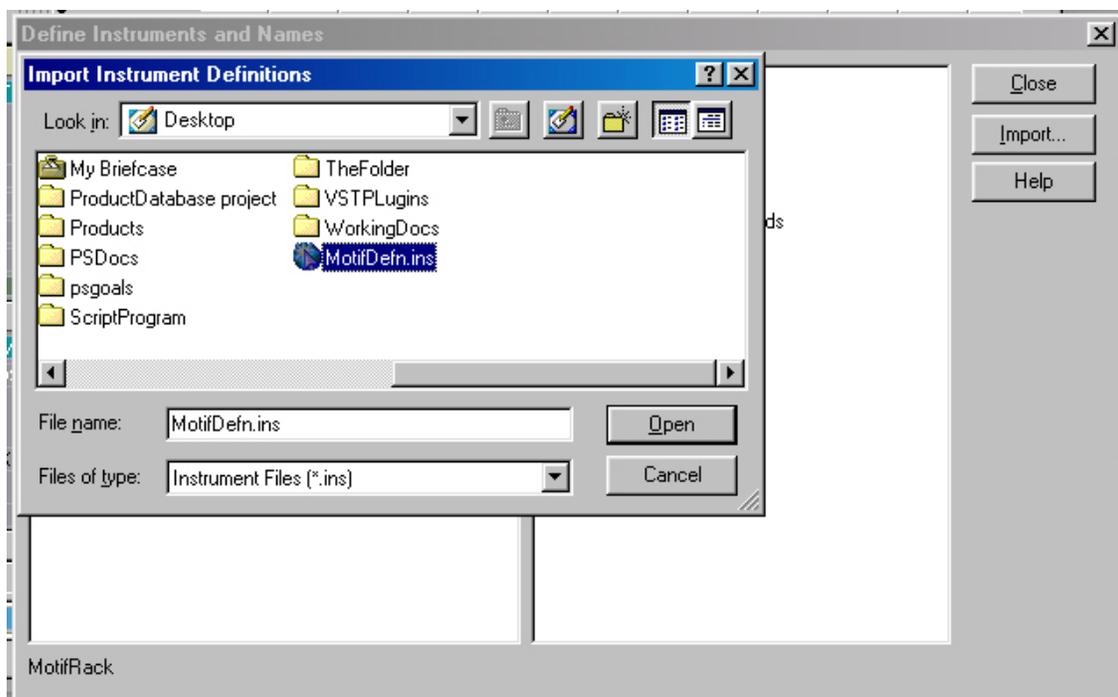

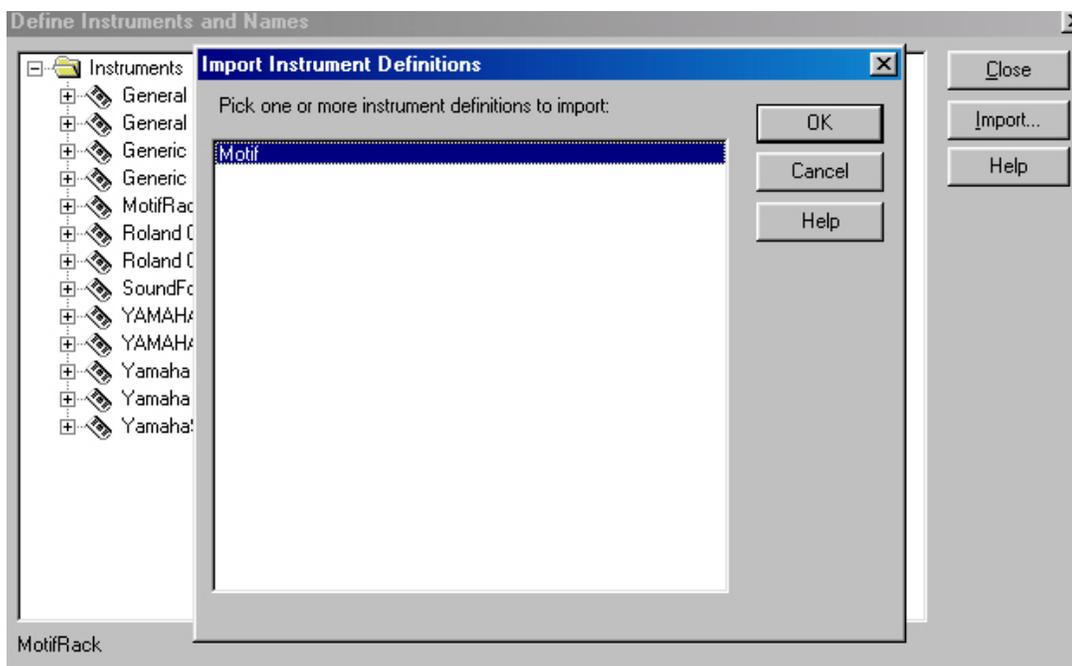

"Click" on [DEFINE].

"Click" [IMPORT] and go to where you downloaded the .ins file.

Define Instruments and Names

Help

MotifRack

Select the .ins file by highlighting it and click [OK].

After the file has been imported "click" on [CLOSE].

Select which PORT or PORTS you wish the new definition to define in the left window (if the Motif is your only MIDI device then select them all). Select the definition you wish to use in the right window and "click" [OK].

Select a MIDI track and then select a channel.

Select a BANK.

Select your patch name.
